90 Day Projects

Addressing trade waste concerns in the food and beverage industry

Over the last decade SA Water has been moving towards a cost-recovery model for volume and load-based (VLB) trade waste services. This has led to a significant increase in costs for particular industries...

[More](#)

Improving road transport for the agriculture industry

The primary industry sector is working together with the State Government to identify where efficiencies in road transport can be achieved. This includes the potential for improvements in heavy vehicle...
