

Maintaining relevance in a **disrupted** world

(How can we walk into the future?)

David Pender
Knowledge Architect
Principal, Knowledge Perspectives

Tonight

The disrupters
The outcome, key questions & hurdles
The inflexion point
Example – AI in project management
Walking into the future

Disruptive elements

Outcome

3.4m displaced jobs
in Australia alone by 2030

~ 25% of workforce

30%+ of what PMs
do now can be displaced

Key questions

*There is nothing so
difficult as changing oneself*
Buddhist saying

What capacities do I lack
and what am I doing to
develop those capacities?

*For every great problem
there is a simple solution –
and it's wrong.*
Oscar Wilde

Why do we always try
to trivialise complexity?

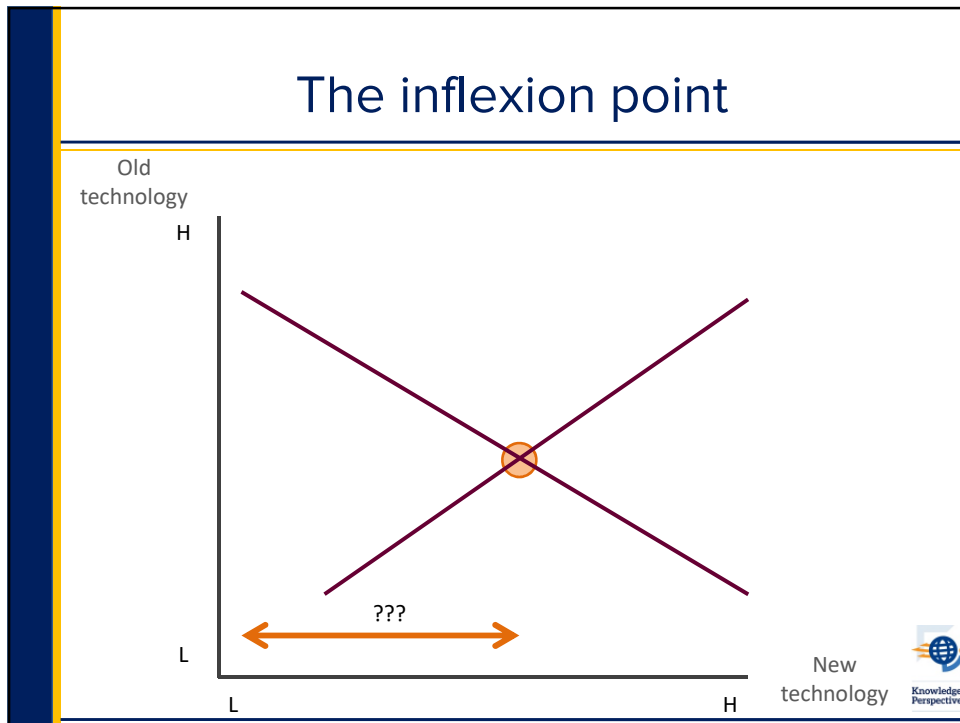

"Thinking avoidance syndrome"

Two hurdles

The inflexion point

AI in project management

Frees up time

Provides support (eg set alerts, track complexity, spot waste, quantify outcomes)

Fill in missing data

Expand project understanding

Improve resource allocation

Walking into the future

When do I start?

Now
Estimate the length of
the yellow line
That's how long you
have

What can I do?

Skill example

Able

Operator

Conceptualiser
